

Draft Regional Flood Plan
Open House Informational Session
Dayton, Texas
August 29, 2022

Welcome and Introductions

Glenn Clingenpeel

Chair, Trinity Regional Flood
Planning Group

Executive Manager, Technical
Services and Basin Planning,
Trinity River Authority

**DRAFT
2022**

REGION 3 TRINITY REGIONAL FLOOD PLAN

Prepared for the Region 3 Trinity Regional
Flood Planning Group

July 2022

TECHNICAL CONSULTANT TEAM
Halff Associates, Inc. (Prime)
Freese and Nichols, Inc.
Nick Fang, Ph.D., P.E.
H2O Partners

4.

EVENT AGENDA

- Regional Flood Planning Overview
- Region 3 Trinity RFPG Accomplishments to Date
- Highlights of Draft Regional Flood Plan, Recommended Local Solutions
- Upcoming Schedule: Planning Milestones, Public Comment Opportunities
- General Q&A
- Breakout Stations: Learn More About Draft Plan, Visit With RFPG Representatives, Share Input

The background of the slide is a deep blue, monochromatic image of an underwater scene. A horizontal line across the upper third of the image represents the water's surface, with gentle ripples and light reflecting off it. Below this line, the water is calm and dark blue, with some faint, blurry light patterns suggesting depth and light filtering down.

What is State and Regional Flood Planning?

Texas' State Flood Planning Process

- 2019: 86th Texas Legislature passed Senate Bill 8, providing new process for statewide flood planning
- Texas Water Development Board (TWDB) charged with implementation
- 15 regional flood planning groups (RFPGs)
- 12 interest categories represented
- First planning cycle started 2020, nearing end (future cycles: 5 years)
- Regional Plans to become part of State Flood Plan Sept. 2024

Regional Flood Planning Process

- Approach modeled after regional water planning
- Grassroots ("bottom up") approach
- Same scope of work for each RFPG
- Regional flood plans will roll up to become State Flood Plan
- Public process

Region 3 Trinity River Basin

- From Cooke County in north to Chambers County on Gulf Coast
- All or part of 38 counties
- Nearly 18,000 square miles, with almost 16,000 stream miles
- 30+ major lakes and reservoirs
- Population approximately 8 million and rapidly growing

The background of the slide is an underwater scene. A horizontal line across the middle represents the water's surface, with a wave crest visible just above it. Below the surface, the water is a deep, clear blue, with some light rays and small bubbles visible, creating a serene and aquatic atmosphere.

Draft Regional Flood Plan Overview

Regional Flood Plan Components

Existing & Future Conditions

Task 1

Introduce region

Task 2

Determine current and future flood risk

Task 3

Establish planning goals

Task 4

Identify potential solutions

Recommended Solutions

Task 5

Select recommended solutions

Task 6

Identify potential impacts

Task 7

Summarize flood response info

Task 8

Recommend improvements

Task 9

Identify funding sources

Task 10

Encourage public participation

Amended to Include

Task 11

Perform additional outreach

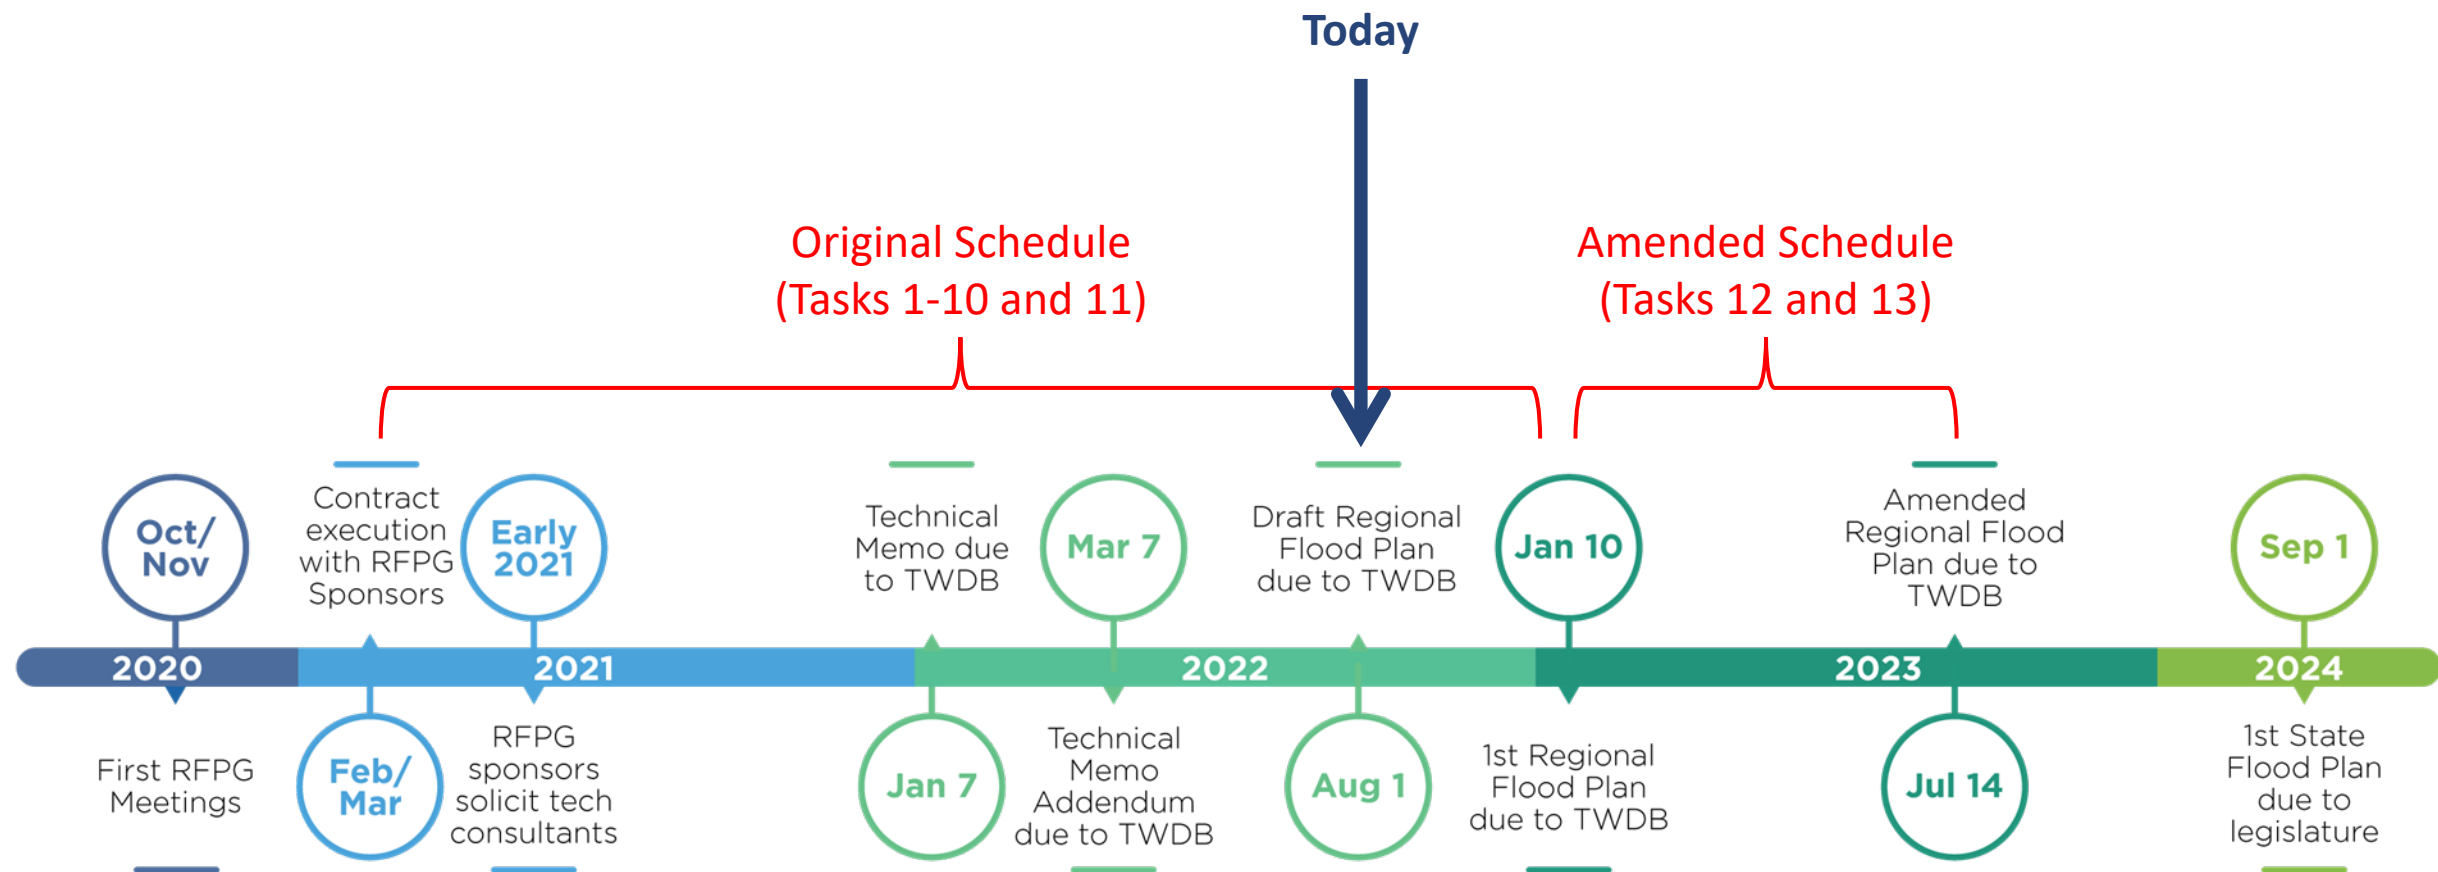

Task 12

Advance FMEs to FMPs

Task 13

Adopt amended plan

Schedule

The background of the slide is a photograph of ocean waves. The water is a deep teal color, and the waves are breaking, creating white foam. The horizon line is visible in the upper third of the image.

Chapters 1 through 3

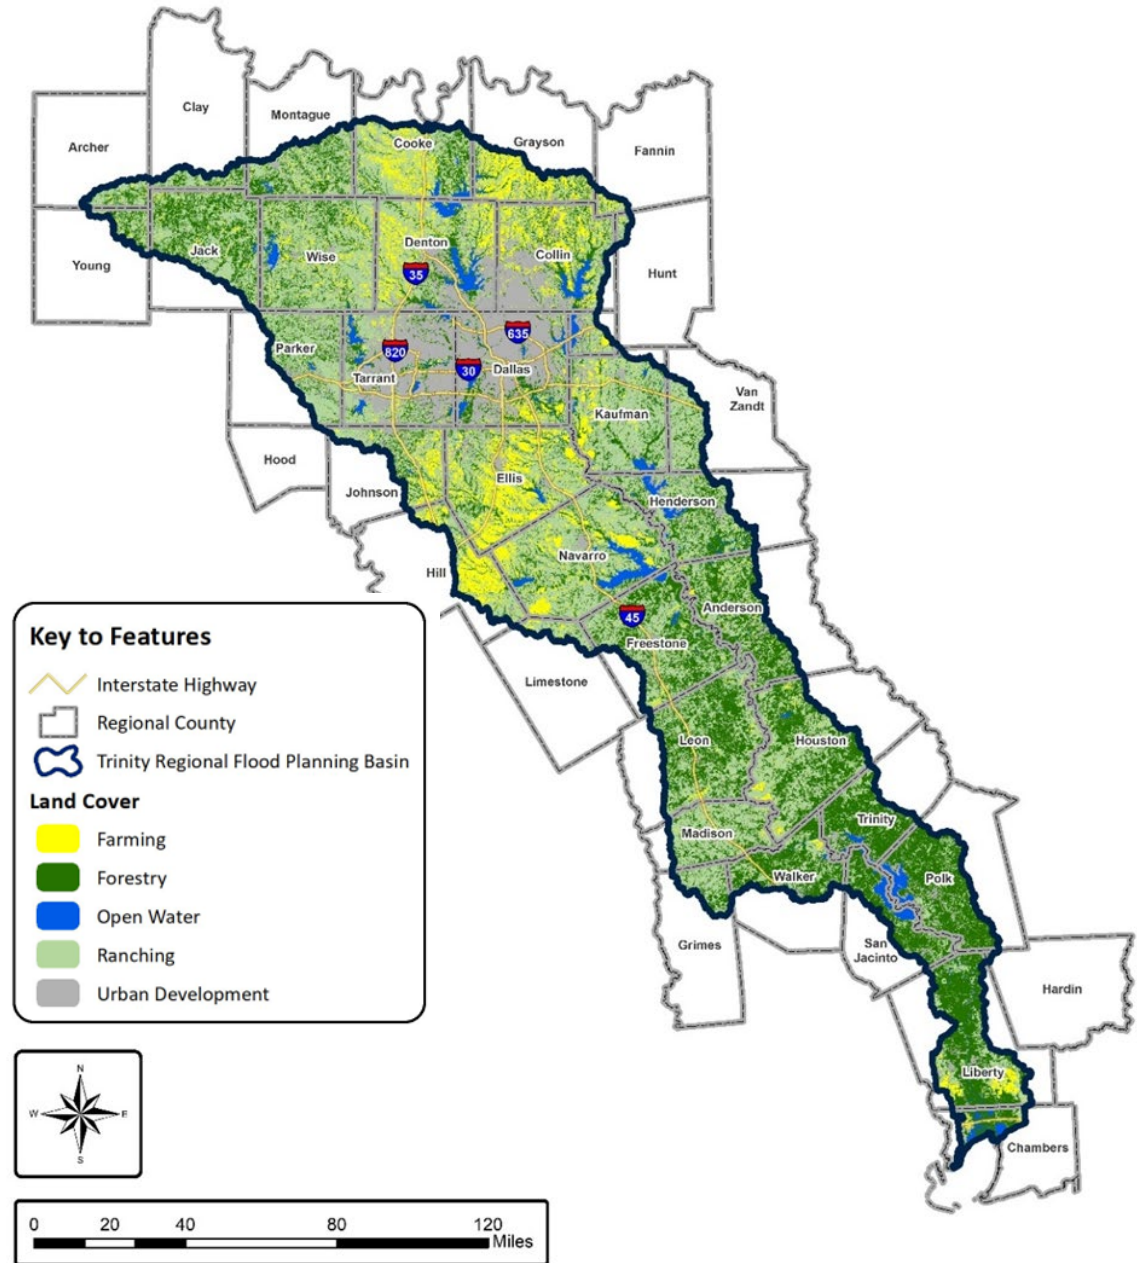

Overview of Region

Current and Future Flood Risk

Planning Goals

Basin-by-Basin: Working Lands

- Farming/ Crop Production
 - Predominant in Upper and Mid Basin areas
 - Concentrations of farming area in Liberty Co.
- Forestry
 - Predominant working land type in Lower Basin
 - Relationship to national forests and preserves
- Ranching
 - Prominent land use throughout basin
 - Largest concentration of ranching areas to NW of Metroplex and in Mid Basin area

Data Collection Website & Outreach

Community Representative?

Community Stakeholders in the RFPG process include individuals with flood-related responsibilities, such as County and Community officials and Staff as well as Federal, State, regional, and local authorities, utilities and districts.

By logging on with your email address and the password provided, you can help provide the RFPGs with localized knowledge of flood planning resources and validate a wide array of flood risk data. Through this data collection effort the RFPG is requesting community stakeholders:

- Provide information about your contact information and flood-related responsibilities.
- Verify collected flood information through an entity-specific backgrounder.
- Respond to questions to support the development of the regional flood plan.
- Verify and provide geospatial data through data uploads and web maps.

The RFPG appreciates any information you are able to verify and provide with the understanding that it may not be possible to provide response to all items.

[Entity Login](#)

Member of the Public?

Public Stakeholders in the RFPG process include general public individuals, groups, and organizations including non-profit and non-governmental organizations with an interest in providing information to support flood planning efforts.

By providing your name, address, and email address, you can help provide the RFPG with localized knowledge of flood prone areas and areas where flood mitigation is needed. Your contact information is used to document who is providing information in case we have any follow-up questions.

Name

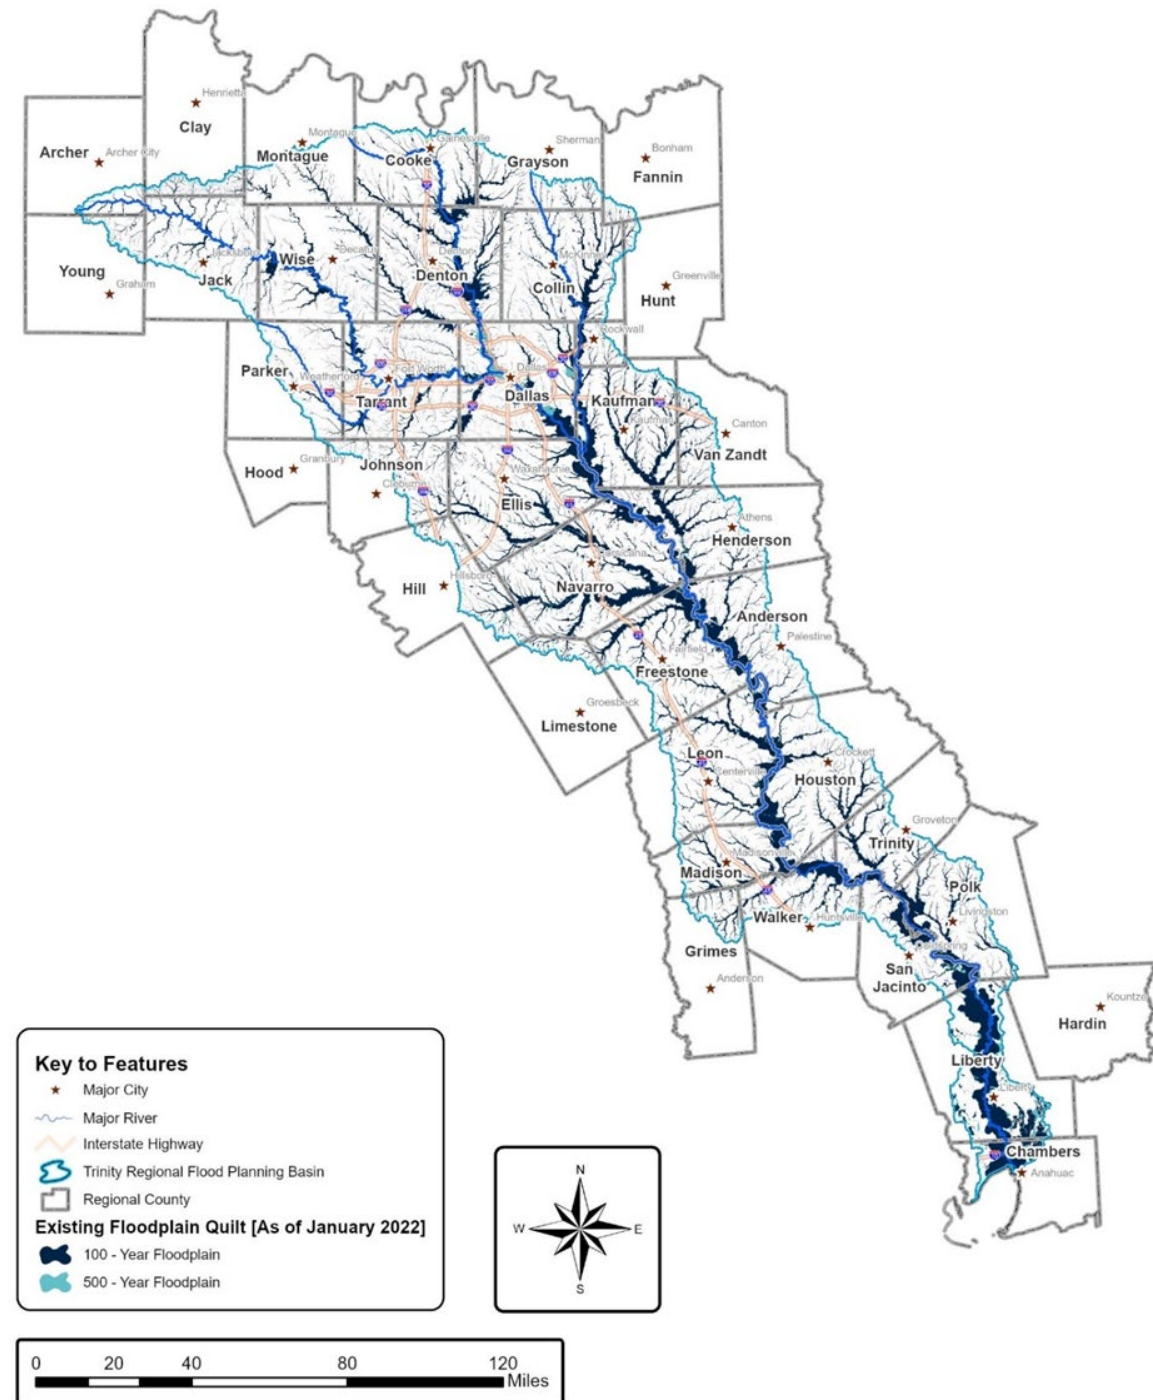

Address

Email

[Take me to the map](#)

Key Findings: Existing Conditions

- Region-wide 1.32 million people displaced by 1% Annual Chance Event (ACE)
- Total value of exposed buildings > \$636 billion
- Even more impact from 0.2% ACE
- Assessed impacts of flooding on socially vulnerable populations and community's ability to recover

Key Findings: Future Conditions

- Hard to assess because few communities map or model
 - RFPG recommended future 1% ACE floodplain as range between current 1% and 0.2% ACE events
 - RFPG recommended 40-foot max buffer for future 0.2% ACE floodplain
- Result: *29% more structures and 25% more people would be potentially impacted by future flood risk conditions*

Key to Features

 Stream Centerline

 Existing 100-Year Limit

 Existing 500-Year Limit

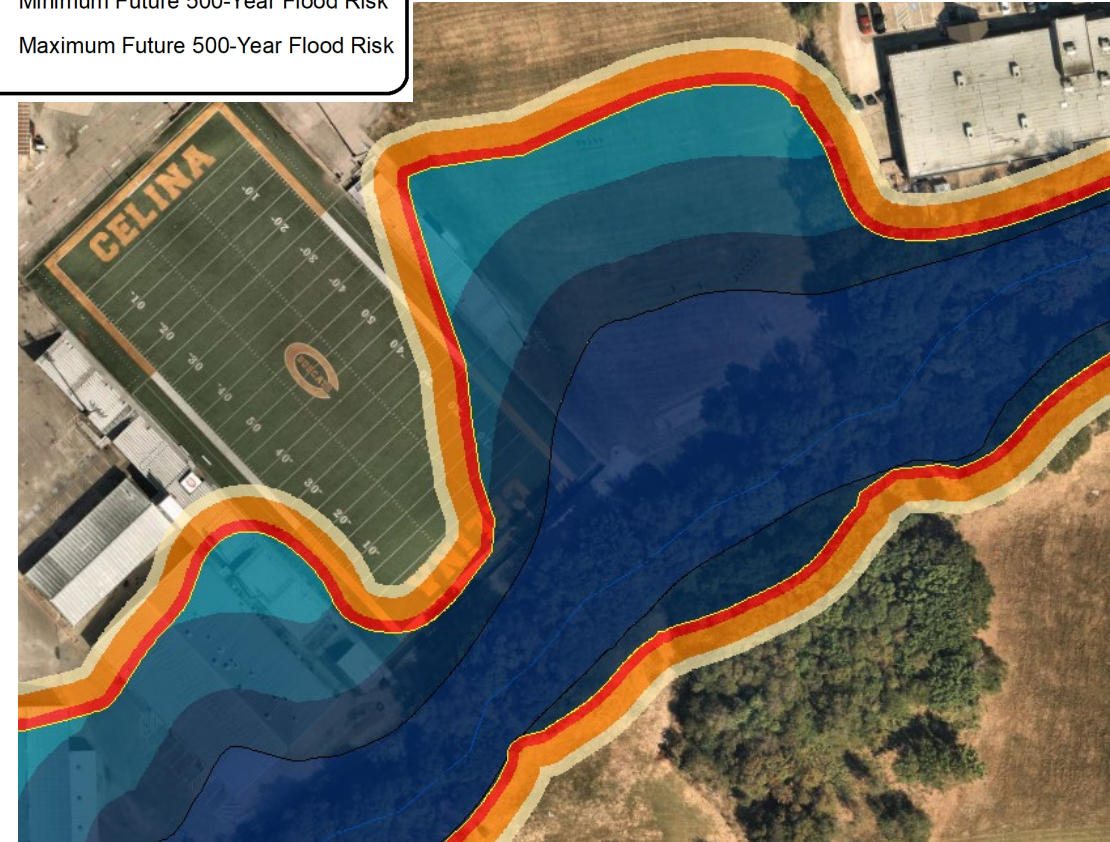

Zone of Potential Expanded Risk

 Minimum Future 100-Year Flood Risk

 Maximum Future 100-Year Flood Risk

 Minimum Future 500-Year Flood Risk

 Maximum Future 500-Year Flood Risk

Regional Flood Planning Goals

- (1) Improve flood warning and public safety
- (2) Improve flood analyses
- (3) Reduce property damage and loss
- (4) Preserve the floodplain
- (5) Improve flood infrastructure
- (6) Expand flood education and outreach
- (7) Expand funding

The background is a deep blue, monochromatic image of an underwater scene. A horizontal line of ripples and waves separates the upper and lower portions of the frame, creating a sense of depth and movement. The text is overlaid on the lower, darker portion of the image.

Chapters 4 and 5

Potentially Feasible Actions
Recommended Actions

Potential Actions

Flood Management Evaluations = FME = *studies*

Flood Mitigation Projects = FMP = *projects*

Flood Management Strategies = FMS = *plans*

The Draft Plan includes a variety of recommendations for each category, totaling over \$1 billion in recommended solutions.

FME: Region-Wide

- 342 out of 356 recommended and included in Draft Plan

FME Type	FME Description	# of FMEs Recommended	Total Cost
Preparedness	Studies on Flood Preparedness	5	\$3,150,000
Project Planning	Previously Identified Drainage Projects and Flood Studies	228	\$60,937,000
Watershed Planning	Flood Mapping Updates, Drainage Master Plans, H&H Modeling, Dam and Levee Failure	108	\$79,879,000
Other	Dam Studies	1	\$2,000,000
Total		342	\$145,966,000

Regional Flood Planning Goals

- (1) Improve flood warning and public safety
- (2) Improve flood analyses**
- (3) Reduce property damage and loss
- (4) Preserve the floodplain
- (5) Improve flood infrastructure
- (6) Expand flood education and outreach
- (7) Expand funding

FMP: Region-Wide

- 7 FMP fully evaluated
- All recommended and included in Draft Plan

Regional Flood Planning Goals

- (1) Improve flood warning and public safety
- (2) Improve flood analyses
- (3) Reduce property damage and loss**
- (4) Preserve the floodplain**
- (5) Improve flood infrastructure**
- (6) Expand flood education and outreach
- (7) Expand funding**

FMP Name	Sponsor	Total Cost
Spring Meadows Estates Detention Pond Design	Sachse	\$1,868,000
West Irving Creek Phases 2, 3, and 4	Irving	\$98,746,000
Arlington VC(A)-1 Drainage and Erosion Improvements	Arlington	\$2,601,000
Lancaster/Foch Area Mitigation	Fort Worth	\$11,771,000
Linwood Park Flood Mitigation (Western Arlington Heights)	Fort Worth	\$50,523,000
Sunnyvale Urban Flooding Reduction Improvements - Area 1	Sunnyvale	\$4,560,000
Sunnyvale Urban Flooding Reduction Improvements - Area 2	Sunnyvale	\$5,701,000
		\$175,770,000

FMS: Region-Wide

- 136 out of 143 recommended and included in Draft Plan

Regional Flood Planning Goals

- (1) **Improve flood warning and public safety**
- (2) Improve flood analyses
- (3) Reduce property damage and loss
- (4) **Preserve the floodplain**
- (5) Improve flood infrastructure
- (6) **Expand flood education and outreach**
- (7) **Expand funding**

FMS Type	FMS Description	# of FMSs Recommended	Total Cost
Education and Outreach	Turn Around, Don't Drown Campaigns; NFIP Education; Flood Education; Dam Safety Education; Floodplain Regulatory Awareness	19	\$975,000
Flood Measurement and Warning	Flood Warning Systems; Rain/Stream Gauges and Weather Stations; Low Water Crossings (LWCs)	20	\$5,300,000
Infrastructure Projects	Hazardous Roadway Overtopping Mitigation Program; Citywide Drainage Improvements; Flood-Proofing facilities	5	\$430,000,00
Other	Debris Clearing Maintenance; Channel Maintenance and Erosion Control; Dam Inspections; Levee Inspections; City Parks; Green Infrastructure; Open Space Programs	12	\$8,525,000
Property Acquisition and Structural Elevation	Acquire High Risk and Repetitive Loss Properties; Acquire and Preserve Open Spaces; Flood-Proofing Facilities	28	\$295,500,000
Regulatory and Guidance	City Floodplain Ordinance Creation/Updates; Zoning Regulations; Land Use Programs; Open Space Regulations	52	\$6,600,000
Total		136	\$746,900,000

FME Status: Lower Basin

- 27 out of 28 recommended and included in Draft Plan

FME Type	FME Description	# of FMEs Recommended	Total Cost
Project Planning	Previously Identified Drainage Projects and Flood Studies	17	\$4,730,000
Watershed Planning	Flood Mapping Updates, Drainage Master Plans, H&H Modeling, Dam and Levee Failure	10	\$7,225,000
Local Area Total		27	\$11,955,000

FMS Status: Lower Basin

- 4 out of 4 recommended and included in Draft Plan

FMS Type	FMS Description	# of FMSs Recommended	Total Cost
Education and Outreach	Flood Education	1	\$60,000
Property Acquisition and Structural Elevation	Acquire High Risk and Repetitive Loss Properties; Flood-Proofing Facilities	2	\$35,000,000
Regulatory and Guidance	County Zoning Regulation Development	1	\$100,000
Local Area Total		4	\$35,160,000

The background of the slide is a photograph of ocean waves, with the water surface visible in the upper half and the deeper, darker water below. The waves are rolling in from the right, creating a sense of movement. The overall color palette is a range of blues, from light turquoise near the surface to deep navy blue in the shadows.

Chapters 6 through 9

Potential Impacts of Actions

Flood Response Summary

Recommended Planning Process Improvements

Potential Funding

Impacts of the Regional Flood Plan

- Total area in need of flood risk identification vs. total area to be evaluated by recommended FMEs
- ~**70%** of mapped areas considered outdated and/or approximate
- ~**38,000** stream miles classified as outdated and/or approximate
- Draft Plan includes **35** county-wide FMEs to improve mapping coverage

Impacts of the Regional Flood Plan - FMP

- Exposure reduction after FMP implementation
- More FMPs to be included in the Amended Plan

Flood Exposure	Existing Conditions	After FMP Implementation	Exposure Reduction from FMPs
	1% ACE	1% ACE	1% ACE
Exposed Structures	1,500	1,108	392
Exposed Population	37,593	33,421	4,172
Exposed Low Water Crossings	9	2	7
Number of Road Closure Occurrences	253	192	61
Road Length (Mi.)	31	23	8

Contributions/Impacts on State Water Plan

Impacts of State Flood Plan on State Water Plan

- Recommended FMSs or FMPs will not have measurable contribution or have negative impact on water supply or water availability
- None of recommended FMSs or FMPs impact operation of existing water supply reservoirs
- Recommended FMSs and FMPs not anticipated to have measurable impact on water supply, water availability, or projects in State Water Plan

Financing Analysis – Who will pay?

Funding surveys sent to Sponsors on 6/7/2022 and 6/14/2022

14% Sponsor response rate (22 of 158) (as of 7/5/2022)

Overall, total cost of **\$1,076,686,000** needed to implement recommended FMEs, FMSs, and FMPs

From total cost, projected **\$961,274,000** of state and federal funding is needed

The background of the slide is a deep teal color with a wavy, horizontal line across the upper third, resembling the surface of water. Below this line, the background is a solid, slightly darker teal. The text is white and positioned on the left side of the slide.

Chapter 10

Public Participation

Public Participation

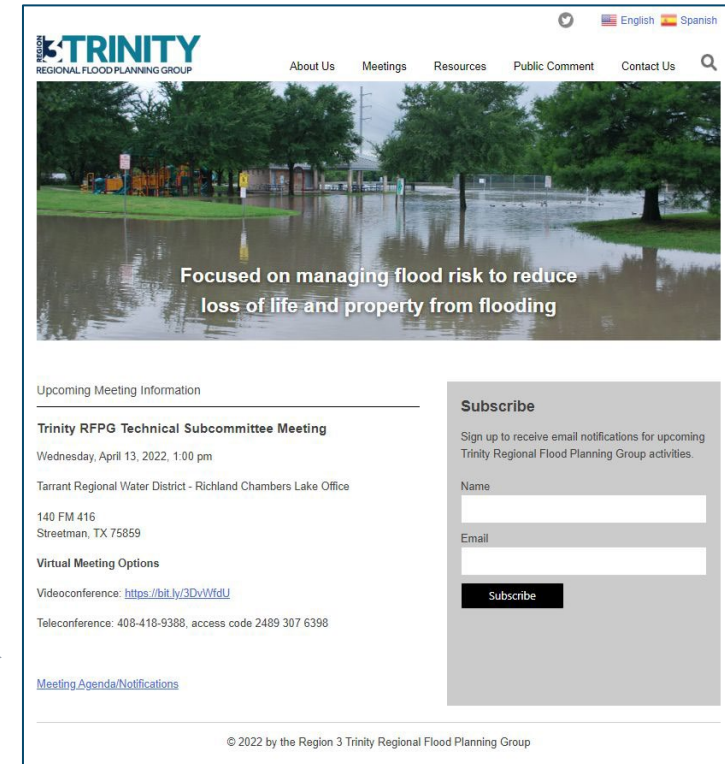

Numerous public meetings of RFPG and Technical Subcommittee, including hybrid meetings across region

Meeting notices and materials posted to website and Texas SOS, and sent via MailChimp to regional stakeholders / interested parties

Maintenance of stakeholders / interested parties database with nearly 850 unique email addresses and nearly 1,100 individual contacts

- City and county officials
- State, federal and other entities with flood planning responsibilities
- Public / interested party sign-ups from website

Development / use of award-winning website

Public Participation

Social media (Twitter) content posted regularly

Press releases and regional media outreach

Development of PowerPoint overview presentation

Presentations to various regional organizations

Public Participation

Postcard mailers to augment email outreach

Follow-up phone calls to stakeholders

Online data gathering survey/tool with interactive webmaps to confirm current flood risk, identify gaps

Handout materials – flyers and one-pagers

Postcard Aug. 2022 encouraging review of Draft Plan, promoting upcoming events and public comments

In-person, open house "roadshow" to showcase Draft Plan, answer questions, at region-wide sites

Public meeting to take public input on Draft Plan

Subsequent public meetings to consider public and TWDB input, revise and finalize Regional Flood Plan

The Trinity Regional Flood Planning Group (Trinity RFPG) needs you!

This newly formed group is responsible for developing the first-ever Regional Flood Plan for the Trinity River Basin and needs your help. We recently sent you an email with a link to our electronic data collection tool. We need your input and local flood-related data to develop a flood plan that accurately represents flood planning resources and flood-related risks in your area. We have also developed an interactive web map on which you can identify specific flood-prone areas.

The Trinity Regional Flood Planning Group (Trinity RFPG) needs you!

This newly formed group is responsible for developing the first-ever Regional Flood Plan for the Trinity River Basin. We need your help! Ultimately, this planning effort is important and relevant for you because projects included in the Regional Flood Plan will be better able to access future State funding.

The Trinity RFPG (aka Region 3) is among 15 regional flood planning groups statewide designated by the Texas Water Development Board. Spanning a region from Cooke County in the north to Chambers County on the Gulf Coast, the Trinity RFPG is responsible for creating its first Regional Flood Plan by January 2023, which will become part of Texas' first-ever State Flood Plan in 2024. The Trinity Flood Plan will comprise local flood mitigation studies and projects that represent the plans of the local jurisdictions.

We have prepared an **electronic data collection tool** that is available at <https://trinity.half.com/> and through the Public Comment page on our website, www.trinityrfg.org. We need your input and local flood-related data to develop a flood plan that represents your flood planning resources and flood-related risks in your area. We have also developed an **interactive web map** (also available through the links above) on which you can identify specific flood-prone areas.

The data collection effort is designed for you to input whatever flood-related data and information you may have. Reports, maps and models can be uploaded to the site. Alternatively, this information can be mailed to the Trinity lead consultant, Half Associates, Inc. at 4000 Fossil Creek Blvd, Fort Worth, TX 76137-1422. The data collection tool is designed to be a "come and go" type tool where you can answer questions one day and come back and answer other questions another day. You can also "divide and conquer" by sending coworkers who have the relevant data the link and asking them to answer specific questions.

In order to be ready to participate in the data collection effort, we encourage you to gather up the following information (if available):

- Floodplain ordinance
- Development regulations
- Land use plans
- Watershed studies or flood studies
- Hydraulics and hydrology models
- Flood maps
- Flood early warning system information
- Drainage criteria manual
- Capital improvement projects (flood-related)
- Planned flood studies

To ensure you receive the survey and other future e-updates, we ask that you be sure to add info@trinityrfg.org to your approved or recognized list of email addresses. As the Trinity RFPG begins this data collection effort, we encourage you to stay informed and participate.

If you have any questions or concerns about the data collection tool and/or interactive web map, please contact Project Manager **Stephanie Griffin with Half Associates, Inc.** at (817) 813-5704 or sgriffin@half.com, or you can also email us at info@trinityrfg.org.

Also please feel free to share this information and future e-updates with others who may have an interest in Trinity Regional Flood Planning and encourage them to visit the website when it launches.

Thank you for your interest and participation in this critical regional planning effort!

Regional Flood Plan Adoption Timeline

Upcoming Public Participation Opportunities

Submit comments on Draft Regional Flood Plan by Oct. 10

Web: www.trinityrfpg.org

- Review Draft Plan on Planning Documents page (sort by "2022 Draft Plan")
- Submit comments via form on Public Comment page

Email: info@trinityrfpg.org

Regional Planning Process Questions?

Breakout Stations

- Visit with consultant team and RFBG members, ask questions
- Review interactive floodplain webmap, mark local flooding issues
- Review maps / tables of local recommended flooding solutions
- Review hard copy of Draft Regional Flood Plan
- Access RFBG website to view Draft Plan, sign up for e-updates, complete Public Comment form
- Submit written comment cards
