

APPENDIX D: Progression of Refining Goals

An underwater photograph of ocean waves, showing the surface and the deep blue water below. The waves are in the upper half of the frame, with light reflecting off their crests. The water below is a deep, dark blue.

Ch. 3 Introduction & Overview

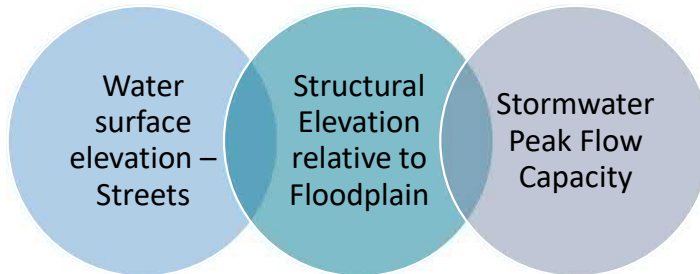

Floodplain Management Practices & Flood Protection Goals

Standards vs. Goals

Standards

Establish consistent protocols for floodplain management that can be universally applied

Examples:

Goals

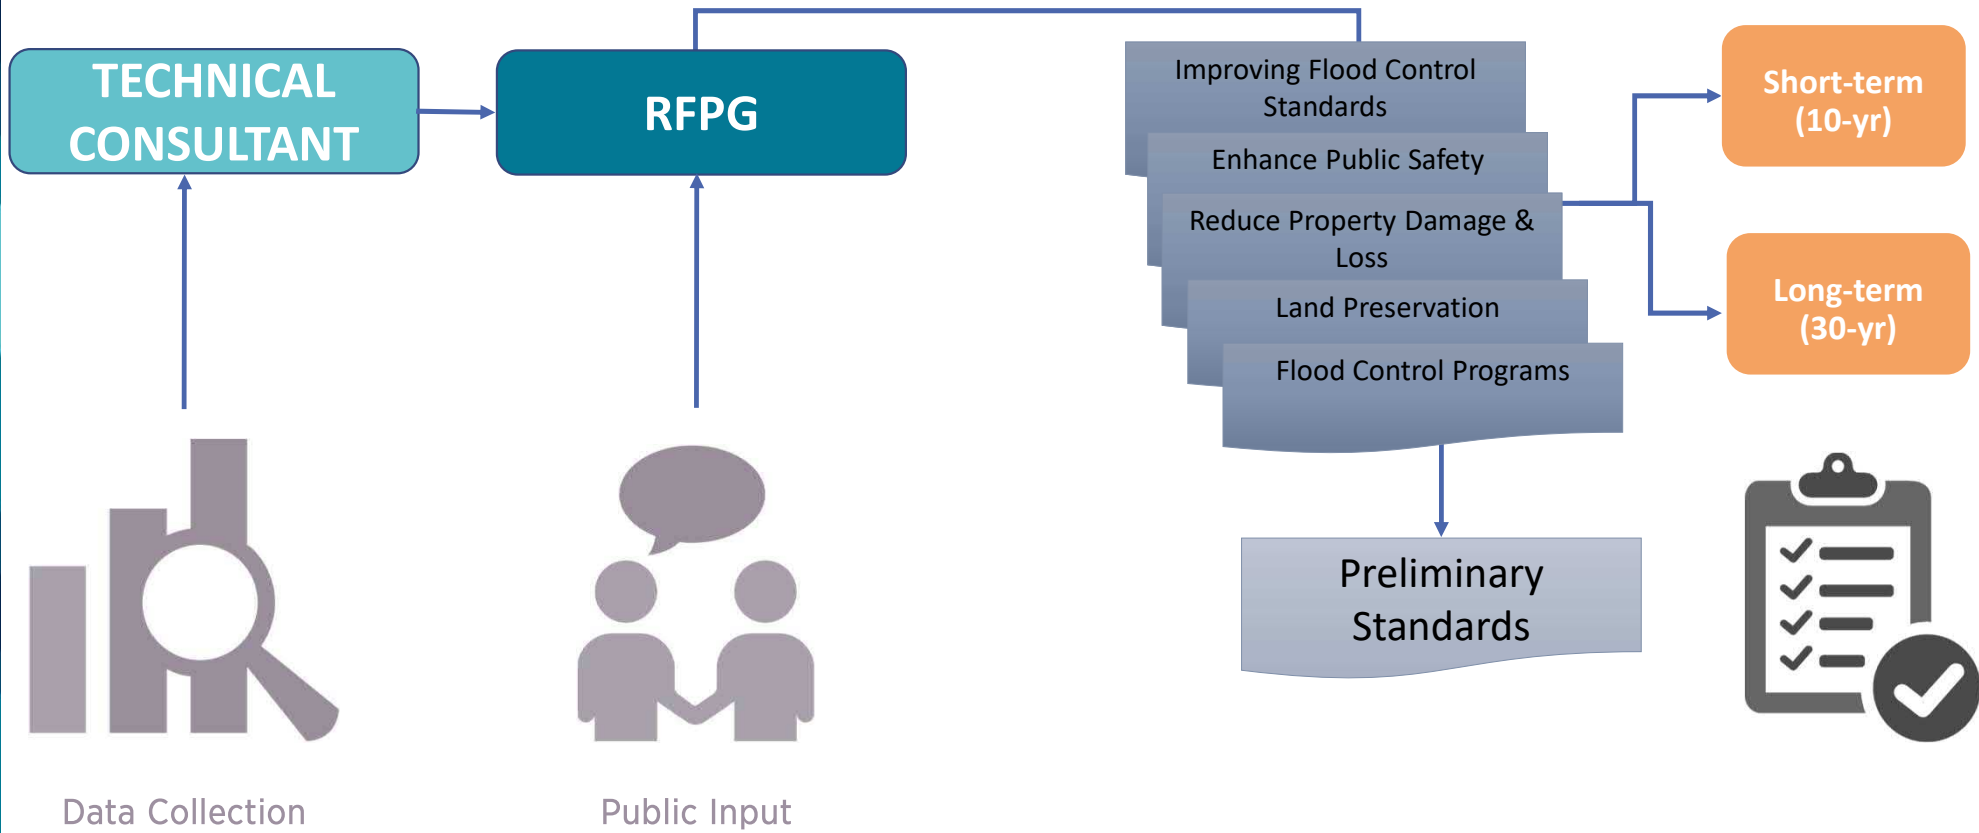

Set specific timelines and goalposts to implement proven flood mitigation measures, reducing future risk for people and property.

Examples:

Must be measurable and have a timeframe!

Goal Setting Process

TWDB Guidance - The Givens

**What does TWDB
hope to achieve with
this plan?**

Goals Must Be:

Specific &
Achievable

Reduce Residual
Risk

Recommended
or
Required

Short-term (10 years)
&/or
Long-Term (30 years)

Regionwide
Or Subregional

POLL EVERYWHERE

We will be using remote audience engagement tool **Poll Everywhere** during today's meeting. Please participate using one of the following methods:

Please choose one word that describes your top priority for the Regional Flood Planning Effort.

June 24, 2021 Trinity RFPG Meeting

Please choose one word that describes your top priority for the Regional Flood Planning Effort.

A word cloud of terms related to flood planning. The words are arranged in a cluster, with 'risk' being the largest and most central word. Other prominent words include 'mitigation', 'management', 'coordination', and 'consistency'. Smaller words include 'protection', 'data', 'funding', 'reduction', 'resiliency', 'rural', and 'proactive'.

protection data
consistency risk mitigation
funding management
coordination
reduction resiliency rural
reduction. proactive

What will we do with your input?

At our August meeting, we will present you with draft goals for your approval that incorporate the feedback today, the results of our research and the TWDB’s guidance for measurable plan goals

Example Goals				
Goal	Term of Goal	Target Year	Applicable to	Overarching Goal
50% of the region’s population is part of a municipality that has a dedicated funding mechanism for drainage projects.	Short Term	2033	Entire Region	Protect against the loss of life and property
Consider and incorporate nature-based practices in flood risk reduction projects.	Short Term	2033	Entire Region	Protect against the loss of life and property
Enroll 50% of non-participating communities into the National Flood Insurance Program.	Short Term	2033	Entire Region	Protect against the loss of life and property

Ch. 3 Goals Discussion/ Determination

Floodplain Management Practices & Flood Protection Goals

The following are suggested ideas for discussion on August 19th.
Please come prepared to discuss.

Task 3-Goals

Purpose and Intent

The purpose of this task is to identify flood mitigation and floodplain management goals for the Trinity region. The overarching intent of the goals is “to protect against the loss of life and property” set out in Guidance Principles in 31 TAC §362.3 to 1) identify and reduce the risk and impact to life and property that already exists, and 2) avoid increasing or creating new flood risk by addressing future development within the areas known to have existing or future flood risk.

Overarching Goals

The overarching goals are intended to guide the development of the Flood Management Strategies (FMSs), Flood Management Evaluations (FMEs), and Flood Mitigation Projects (FMPs) for the Trinity Regional Flood Planning region. They build upon TWDB regional flood planning guidance and provide a comprehensive organization structure for future strategy development to adequately provide for the preservation of life and property, while not negatively affecting neighboring areas. These proposed six overarching goals include:

- Improving Flood Warning & Public Safety
- Improving Flood Analysis
- Reducing Property Damage & Loss
- Protecting the Floodplain
- Flood Infrastructure Improvement
- Expanding Flood Education & Outreach

The overarching goals are further detailed below and include specific goal statements which are measurable and achievable.

Benefits

Once the regional flood plan is complete, realization of the goals will occur through the implementation of the associated FMSs, FMEs, and FMPs established in this plan. Implementation of the goals will demonstrate progress towards the overall purpose and intent of this regional flood planning study and will provide a series of benefits to individuals, communities, and the overall flood planning region as a whole. The benefits are set in Table 3.X, below.

Table 3.X, Flood Planning Goals and Benefits

Example Goals							
Overarching Goal	Goal 1: Flood Warning & Public Safety	Goal 2: Improving Flood Analyses	Goal 3: Reducing Property Damage & Loss	Goal 4: Protecting the Floodplain	Goal 5: Flood Infrastructure Improvement	Goal 6: Flood Education & Outreach	Legend:
Protect against the loss of life	●	●	◐	◐	●	◐	◐ Potential benefit ● Benefit * Single project with multiple benefits, i.e. improves floodplain protection and water supply, increases recreation opportunities, habitat preservation, etc.
Protect against the loss of property	◐	●	●	◐	●	◐	
Protect infrastructure	●	●	●		●		
Protect the environment	●	◐	●	●			
Protect water supply			◐	●	◐		
Sustain the economy	●	◐	●		◐		
Design for co-benefits*			◐	●	●		
Increase public awareness	●	●				●	
Build community support	●	●				●	

Specific Goal Statements

Goal 1. Improving Flood Warning & Public Safety

Improve the dissemination of information regarding early flood recognition and danger, emergency response procedures, and post-flood recovery actions.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the number of communities with warning and emergency response programs that can detect the flood threat and provide timely warning of impending flood danger.	Initiated	Maintained
B	Improve regional standards for data sharing and warning systems	TBD	TBD
C	Reduce the number of low-water crossings with no warning system by ----%	TBD	TBD
D	Reduce 5-year moving average of flood related fatalities in the flood planning region by __% by 2033	TBD%	TBD%

Goal 2. Improving Flood Analyses

Increase the number and extent of regional flood planning studies (FMEs) and analyses to better prepare communities for implementing flood mitigation projects.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the number of entities which utilize/adopt Atlas 14 (Volume 11) revised rainfall amounts as part of revisions to design criteria and flood prevention regulations by X. (region specific)	TBD	TBD
B	Increase the coverage of flood hazard data in the FPR by reducing the current gaps in floodplain mapping by ____%.	TBD	TBD
C	Increase utilization of the new base level engineering (BLE) data (pending) by regional entities in the FPR by X.	TBD	TBD
D	Increase the number of communities that perform detailed studies of localized/urban flooding impacts by X%	TBD	TBD

Goal 3. Reducing Property Damage & Loss

Increase the number and extent of protective regulatory measures and programs to limit future risk and reduce flood damage in the flood planning region.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the number of communities who adopt floodplain standards equal to or greater than the NFIP minimum by X%	TBD	TBD
B	Increase the number of participating Community Rating System (CRS) communities in the FPR by X.	TBD	TBD
C	Increase the number of entities that have a dedicated municipal drainage charge, drainage district fee, or other continuous funding mechanism by X, to implement future FMEs and FMPs.	TBD	TBD
D	Increase the number of communities at have adopted regulations to reduce the risk from localized flooding by X.	TBD	TBD
E	Reduce the number of counties that do not have floodplain standards that meet or exceed the NFIP-minimum standards by X.	TBD	TBD
F	Increase the number of communities which designate their level of enforcement of floodplain management as “high activity” by X percent per each cycle. (incremental increase in level of enforcement)	TBD	TBD
G	Increase the number of communities which regulate to one or more feet above the BFE for future 100-year conditions by X per each cycle.	TBD	TBD
H	Increase the number of communities in the Flood Plain Region that designate the 1% annual chance floodplain on the entity’s future land use plan by X.	TBD	TBD
I	Increase the number of communities in the FPR that provide regional detention as part of an overall floodplain management program by X.	TBD	TBD
J	Reduce exposure of existing structures in the current 1% annual chance floodplain by elevating or floodproofing X% of structures by X.	TBD%	TBD%

Goal 4. Protecting the Floodplain

Reduce the amount of existing and future vulnerable properties within the FPR.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Reduce the number of vulnerable properties (i.e. through property buyouts, acquisitions, and/or relocations) by X%.	TBD%	TBD%
B	Increase the acreage of publicly protected natural areas by X % as part of property buyouts and acquisitions to reduce future impacts of flooding.	TBD	TBD
C	Reduce the number of repetitive-loss properties in the FPR by X.	TBD	TBD
D	Avoid new exposure to flood hazards by adopting land use and subdivision regulations that direct development away from the floodplain in X communities.	TBD	TBD

Goal 5. Flood Infrastructure Improvement

Reduce future vulnerability to existing structures through improved elevation and other flood proofing programs and initiatives. Reduce flood risk and mitigate flood hazards to life and property through the implementation of flood infrastructure projects.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Reduce the number of vulnerable critical facilities located within the existing and future 1% annual chance floodplain by X.	TBD	TBD
B	Reduce the number of low water crossings located within the existing and future 1% annual chance floodplain by X%.	TBD	TBD
C	Increase the number of nature-based practices as part of flood risk reduction projects by X.	TBD%	TBD%

Goal 6. Expanding Flood Education & Outreach

Increase the amount of flood education and outreach opportunities to improve awareness of flood hazards and future participation throughout the flood planning region (FPR).

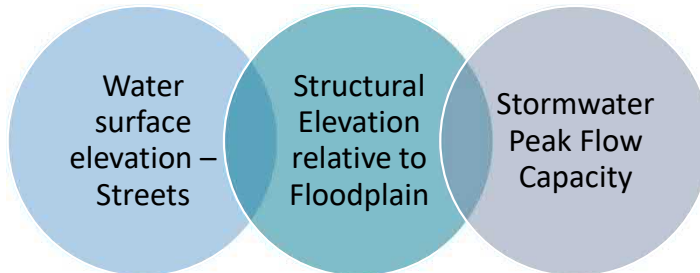

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the number of public stakeholder participants in the regional flood planning process by X percent per each flood planning cycle.	TBD%	TBD%
B	Increase the number of community stakeholder entities participating in the regional flood planning process by X percent per each cycle.	TBD%	TBD%
C	Increase the number of public outreach and education activities to improve awareness of flood hazards and benefits of flood planning in the FPR by X.	TBD	TBD

Standards vs. Goals

Standards

Establish consistent protocols for floodplain management that can be universally applied

Here's What We Heard

Below are overarching goals based on your guidance in our last meeting. The table below helps describe how they will help communities achieve the plan's objectives.

Example Goals							
Overarching Goal	Goal 1: Flood Warning & Public Safety	Goal 2: Improving Flood Analyses	Goal 3: Reducing Property Damage & Loss	Goal 4: Protecting the Floodplain	Goal 5: Flood Infrastructure Improvement	Goal 6: Flood Education & Outreach	Legend:
Protect against the loss of life	●	●	◐	◐	●	◐	◐ Potential benefit ● Benefit * Single project with multiple benefits, i.e. improves floodplain protection and water supply, increases recreation opportunities, habitat preservation, etc.
Protect against the loss of property	◐	●	●	◐	●	◐	
Protect infrastructure	●	●	●		●		
Protect the environment	●	◐	●	●			
Protect water supply			◐	●	◐		
Sustain the economy	●	◐	●		◐		
Design for co-benefits*			◐	●	●		
Increase public awareness	●	●				●	
Build community support	●	●				●	

Goal 1. Improving Flood Warning and Public Safety

A Increase the number of communities with warning and emergency response programs that can detect the flood threat and provide timely warning of impending flood danger.

B Improve regional standards for data sharing and warning systems

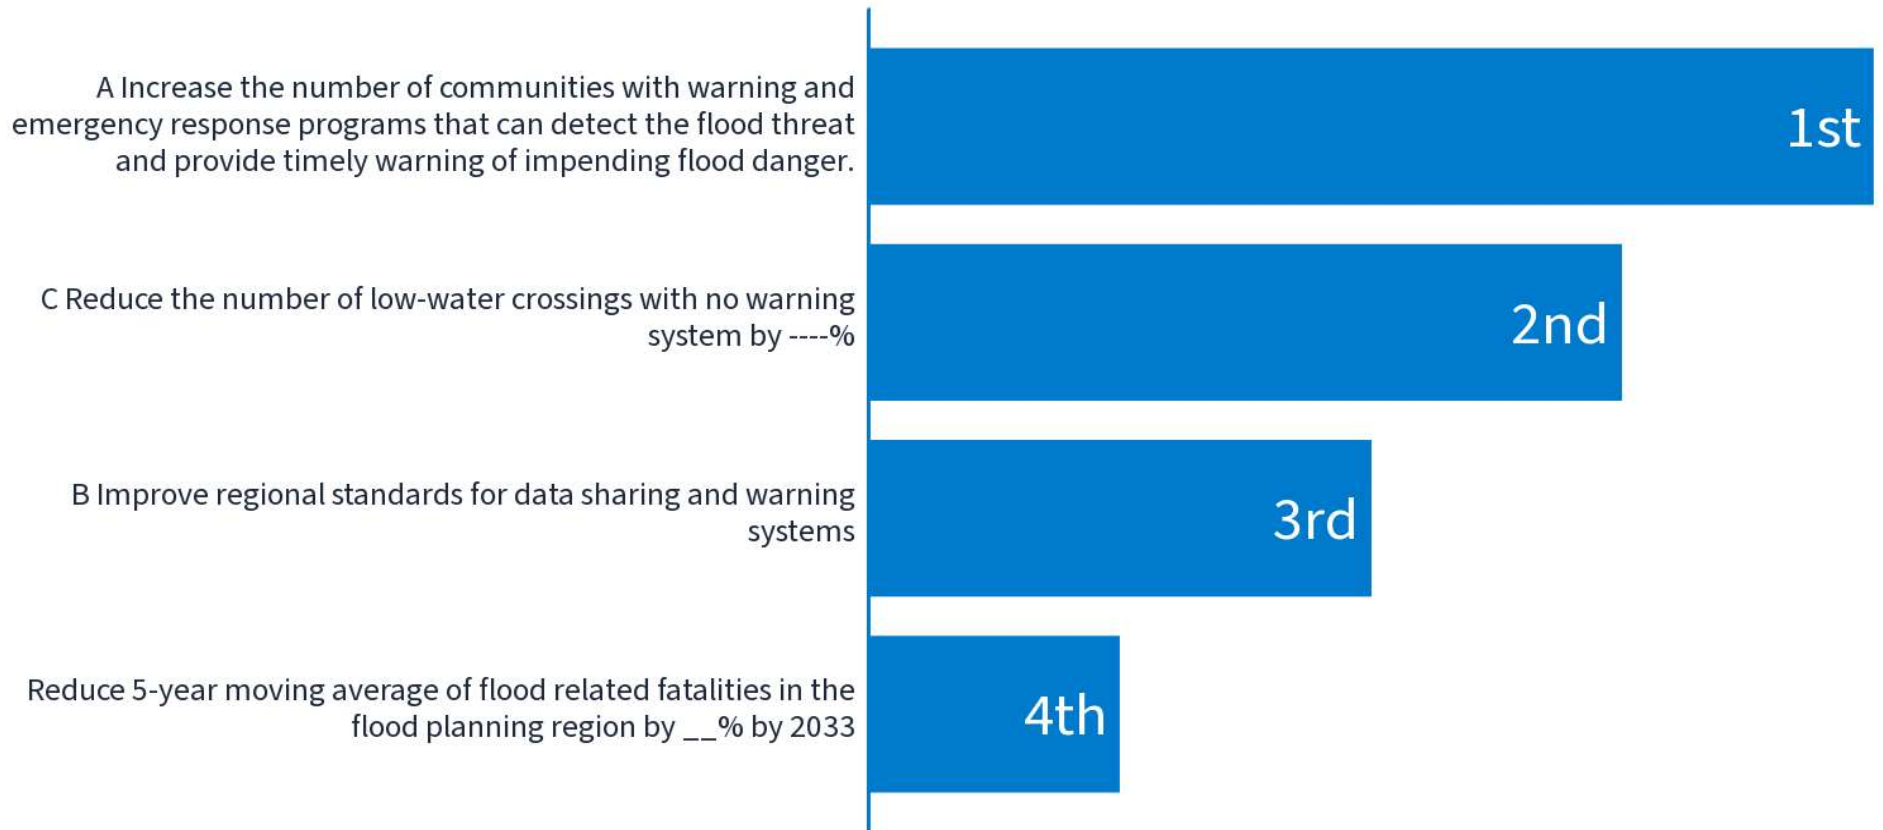

C Reduce the number of low-water crossings with no warning system by ----%

Reduce 5-year moving average of flood related fatalities in the flood planning region by __% by 2033

Specific Goal Statements

Goal 1. Improving Flood Warning & Public Safety

Improve the dissemination of information regarding early flood recognition and danger, emergency response procedures, and post-flood recovery actions.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the number of communities with flood warning programs that can detect flood threats and provide timely warning of impending flood danger.	Initiated	Maintained
B	Improve safety at low water crossings by adding warning systems/signage or improving low water crossings in high-risk areas	100 crossings	300 crossings

Goal 2. Improving Flood Analyses

Increase the number and extent of regional flood planning studies (FMEs) and analyses to better prepare communities for implementing flood mitigation projects.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the coverage of flood hazard data in the FPR by performing detailed studies using the best available land use and precipitation data to reduce gaps in floodplain mapping.	25% gap reduction	100% gap reduction
B	Increase the number of detailed studies of localized/urban flooding impacts within the FPR.	5	25
C	Increase the number of studies that utilize latest and most appropriate precipitation and land use data as part of revisions to design criteria and flood prevention regulations.	10	50

Goal 3. Reducing Property Damage & Loss

Increase the number and extent of protective regulatory measures and programs to limit future risk and reduce flood damage in the flood planning region.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the number of entities that have floodplain standards that meet or exceed the NFIP-minimum standards.	5	25
B	Reduce the number of structures within the 1% floodplain (i.e. through structural projects, property buyouts, acquisitions, and/or relocations).	5%	10%
C	Reduce the number of vulnerable Critical Facilities located in the existing 1% annual chance floodplain.	20	50
D	Reduce the financial impact of flood-related agricultural losses	\$2,000,000	\$20,000,000
E	Increase the number of entities that have a dedicated municipal drainage charge (stormwater utility fee), drainage district fee, or other continuous funding mechanism to implement future FMEs and FMPs.	10	50
F	Increase the number of communities that implement regional detention as part of an overall floodplain management program.	5	25
G	Increase the number of communities that have adopted regulations to reduce the risk from localized/urban flooding.	3	10

Goal 4. Floodplain Preservation

Maintain the natural and beneficial functions of floodplains by preservation and conservation programs.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the acreage of publicly protected natural areas to reduce future impacts of flooding.	5%	10%
B	Increase the number of entities that designate the 1% annual chance floodplain on the entity's future land use plan.	20	50
C	Avoid new exposure to flood hazards by adoption of comprehensive plans or subdivision regulations that direct development away from the floodplain.	20 entities	50 entities

Goal 5. Flood Infrastructure Improvement

Reduce flood risk and mitigate flood hazards to life and property through the maintenance and rehabilitation of existing infrastructure and implementation of new flood infrastructure projects.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Develop a program and schedule for the maintenance of high hazard dams and levees within the FPR.	10%	50%
B	Increase the number of nature-based practices as part of flood risk reduction projects.	20	50
C	Improve flood infrastructure by maintaining streams and drainage channels to protect agricultural lands from flooding.	5 stream miles	50 stream miles

Goal 6. Expanding Flood Education & Outreach

Increase the amount of flood education and outreach opportunities to improve awareness of flood hazards and maximize future participation throughout the flood planning region (FPR).

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Improve the participation of community stakeholder entities in the regional flood planning process.	35%	90%
B	Increase the number of local entities that host public outreach and education activities each year to improve awareness of flood hazards and benefits of flood planning in the FPR.	20	50

Ch. 3 Floodplain Management Practices and Goals

Consider Approval of Goals

Discussion of Floodplain Management Practices

Consider Approval of Recommending or Adopting Specific Floodplain
Management Practices

Goal 1. Improving Flood Warning & Public Safety

Improve the dissemination of information regarding early flood recognition and danger, emergency response procedures, and post-flood recovery actions.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the number of communities with flood warning programs that can detect flood threats and provide timely warning of impending flood danger.	Initiated	Maintained
B	Improve safety at low water crossings by adding warning systems/signage or improving low water crossings in high-risk areas.	100 crossings	300 crossings

Goal 2. Improving Flood Analyses

Increase the number and extent of regional flood planning studies (FMEs) and analyses to better prepare communities for implementing flood mitigation projects.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the availability of flood hazard data that uses the best available land use and precipitation data to reduce gaps in floodplain mapping.	25% gap reduction	95% gap reduction
B	Increase the number of entities that conduct detailed studies of localized/urban flooding impacts within the FPR.	Establish a baseline measurement	30%
C	Increase the number of communities that utilize latest and most appropriate precipitation and land use data as a basis for design criteria and flood prevention regulations.	Establish a baseline measurement	30%

Goal 3. Reducing Property Damage & Loss

Increase the number and extent of protective regulatory measures and programs to limit future risk and reduce flood damage in the flood planning region.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the number of entities that have floodplain standards that meet or exceed the NFIP-minimum standards.	5	25
B	Reduce the number of structures within the 1% floodplain (i.e. through structural projects, property buyouts, acquisitions, and/or relocations).	5%	10%
C	Reduce the vulnerability of agriculture, ranching and forestry to flood-related losses.	Establish a baseline measurement	30%

Goal 4. Floodplain Preservation

Maintain the natural and beneficial functions of floodplains by preservation and conservation programs.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the acreage of publicly protected natural areas for flood and ecosystem purposes to reduce future impacts of flooding.	Establish a baseline measurement	10%
B	Increase the number of entities that designate the 1% annual chance floodplain on Future Land Use plans that serve as the basis for zoning regulations	20	50
C	Avoid new exposure to flood hazards by adopting comprehensive plans or subdivision regulations that direct development away from the floodplain.	Establish a baseline measurement	10%

Goal 5. Flood Infrastructure Improvement

Reduce flood risk and mitigate flood hazards to life and property through the maintenance and rehabilitation of existing infrastructure and implementation of new flood infrastructure projects.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the number of nature-based practices as part of flood risk reduction projects.	Establish a baseline measurement	30%
B	Improve flood infrastructure and properly maintain streams and drainage channels to protect agricultural lands from flooding	5 stream miles	50 stream miles

Goal 6. Expanding Flood Education & Outreach

Increase the amount of flood education and outreach opportunities to improve awareness of flood hazards and future participation throughout the flood planning region (FPR).

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Improve the participation of community stakeholder entities in the regional flood planning process.	35%	90%
B	Increase the number of local entities that host annual public outreach and education activities to improve awareness of flood hazards, benefits of flood planning, and procedures associated with emergency response associated with flooding.	Establish a baseline measurement	50
C	Increase the number of communities that work cooperatively as part of an overall floodplain management program.	5	25

**Consider approval of floodplain
management goals**

Region 3 Trinity RFPG: Draft Specific Goal Statements

As Reviewed and Approved by Region 3 RFPG on 09/23/21

Goal 1. Improving Flood Warning & Public Safety

Improve the dissemination of information regarding early flood recognition and danger, emergency response procedures, and post-flood recovery actions.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the number of communities with flood warning programs that can detect flood threats and provide timely warning of impending flood danger.	Initiated	Maintained
B	Improve safety at low water crossings by adding warning systems/signage or improving low water crossings in high-risk areas	100 crossings	300 crossings

Goal 2. Improving Flood Analyses

Increase the number and extent of regional flood planning studies (FMEs) and analyses to better prepare communities for implementing flood mitigation projects.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the availability of flood hazard data that uses the best available land use and precipitation data to reduce gaps in floodplain mapping.	25% gap reduction	95% gap reduction
B	Increase the number of entities that conduct detailed studies of localized/urban flooding impacts within the FPR.	Establish a baseline measurement	30%
C	Increase the number of communities that utilize latest and most appropriate precipitation and land use data as a basis for design criteria and flood prevention regulations.	Establish a baseline measurement	30%

Goal 3. Reducing Property Damage & Loss

Increase the number and extent of protective regulatory measures and programs to limit future risk and reduce flood damage in the flood planning region.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the number of entities that have floodplain standards that meet or exceed the NFIP-minimum standards.	5	25
B	Reduce the number of structures within the 1% floodplain (i.e. through structural projects, property buyouts, acquisitions, and/or relocations).	5%	10%
C	Reduce the vulnerability of agriculture, ranching and forestry to flood-related losses.	Establish a baseline measurement	30%

Goal 4. Floodplain Preservation

Maintain the natural and beneficial functions of floodplains by preservation and conservation programs.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the acreage of publicly protected natural areas for flood and ecosystem purposes to reduce future impacts of flooding.	Establish a baseline measurement	10%
B	Increase the number of entities that designate the 1% annual chance floodplain on Future Land Use plans that serve as the basis for zoning regulations	20	50
C	Avoid new exposure to flood hazards by adopting comprehensive plans or subdivision regulations that direct development away from the floodplain.	Establish a baseline measurement	10%

Goal 5. Flood Infrastructure Improvement

Reduce flood risk and mitigate flood hazards to life and property through the maintenance and rehabilitation of existing infrastructure and implementation of new flood infrastructure projects.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the number of nature-based practices as part of flood risk reduction projects.	Establish a baseline measurement	30%
B	Improve flood infrastructure and maintain streams and drainage channels to protect agricultural lands from flooding	Establish a baseline measurement	10%

Goal 6. Expanding Flood Education & Outreach

Increase the amount of flood education and outreach opportunities to improve awareness of flood hazards and future participation throughout the flood planning region (FPR).

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Improve the participation of community stakeholder entities in the regional flood planning process.	35%	90%
B	Increase the number of local entities that host annual public outreach and education activities to improve awareness of flood hazards, benefits of flood planning, and procedures associated with emergency response associated with flooding.	Establish a baseline measurement	50
C	Increase the number of communities that work cooperatively as part of an overall floodplain management program.	5	25

Goal 7. Expand Funding

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Expand eligibility for and use of funding programs (Local, State, Federal, Public/Private Partnerships, etc.)	Establish a baseline measurement	
B	Increase communities with dedicated stormwater funding mechanisms	10%	30%

Ch. 3 Floodplain Management Goals

Proposed Movement of Goal 7.A

- Original Text: Expand eligibility for and use of funding programs (Local, State, Federal, Public/Private Partnerships, etc.)
- No FMEs, FMPs or FMSs align with goal

Chapter 8

Proposed adjustments to goals based on QC review

- Goal 4.B

- Original text: Increase the number of entities that designate the 1% annual chance floodplain on Future Land Use plans that serve as the basis for zoning regulations
- Proposed text: Increase the number of entities that **designate include** the 1% annual chance floodplain on Future Land Use plans ~~that serve as the basis for zoning regulations~~

- Goal 5.B

- Original text: Improve flood infrastructure and maintain streams and drainage channels to protect agricultural lands from flooding
- Proposed text: Improve flood infrastructure and maintain streams and drainage channels to ~~protect~~ **reduce flood risk to** agricultural lands ~~from flooding~~

- Goal 7.A

- Original Text: Expand eligibility for and use of funding programs (Local, State, Federal, Public/Private Partnerships, etc.)
- Proposed text: Expand eligibility for and use of funding **for stormwater and flood mitigation solutions** ~~programs~~ (Local, State, Federal, Public/Private Partnerships, etc.)

Items for Possible Inclusion

FMEs

- Dams & Levees
 - Emergency Action Plans
 - Failure Inundation Studies
 - Identify/Evaluate High Hazard Dams
- Retention/Detention Ponds
- Critical Facilities

FMPs

- Railroads
- Street Drainage

FMSs

- Infrastructure Inspection
- Floodproofing
 - Structures
 - Critical Facilities

Current Classification

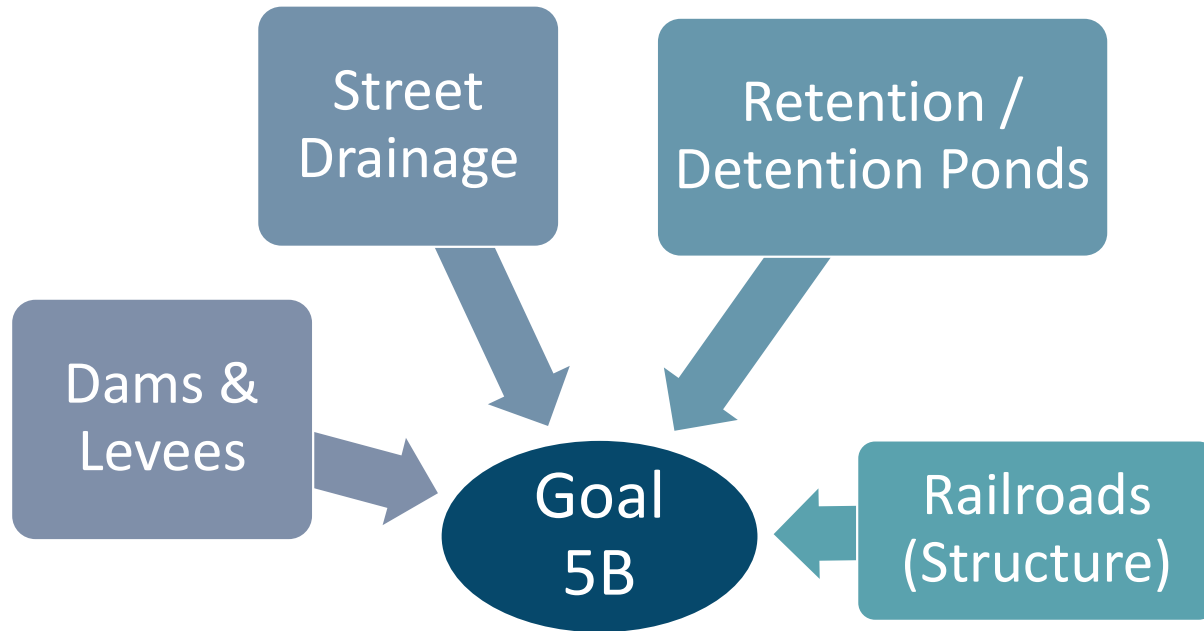

Goal 3. Reducing Property Damage & Loss

Increase the number and extent of protective regulatory measures and programs to limit future risk and reduce flood damage in the flood planning region.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the number of entities that have floodplain standards that meet or exceed the NFIP-minimum standards.	5	25
B	Reduce the number of structures within the 1% floodplain (i.e. through structural projects, property buyouts, acquisitions, and/or relocations).	5%	10%
C	Reduce the vulnerability of agriculture, ranching and forestry to flood-related losses.	Establish a baseline measurement	30%
D	Reduce the number of critical facilities within the 1% floodplain	5%	10%
E	When relocation and/or elevation adjustment is not possible, increase the number of non-residential facilities that implement floodproofing	5	25

Current Classification

Goal 5. Flood Infrastructure Improvement

Reduce flood risk and mitigate flood hazards to life and property through the maintenance and rehabilitation of existing infrastructure and implementation of new flood infrastructure projects.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the number of nature-based practices as part of flood risk reduction projects.	Establish a baseline measurement	30%
B	Improve flood infrastructure and properly maintain streams and drainage channels to protect agricultural lands from flooding	5 stream miles	50 stream miles
C	Improve urban drainage infrastructure to minimize flood risk	50 miles	500 miles
D	Perform annual inspections to maintain existing dams, levees, ponds and other flood mitigation structures	Establish a baseline measurement	10%

Consider approval of edits to goals

Region 3 Trinity RFPG: Specific Goal Statements

As Adopted by Region 3 RFPG on 12/16/21

Goal 1. Improving Flood Warning & Public Safety

Improve the dissemination of information regarding early flood recognition and danger, emergency response procedures, and post-flood recovery actions.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the number of communities with flood warning programs that can detect flood threats and provide timely warning of impending flood danger.	Initiated	Maintained
B	Improve safety at low water crossings by adding warning systems/signage or improving low water crossings in high-risk areas	100 crossings	300 crossings

Goal 2. Improving Flood Analyses

Increase the number and extent of regional flood planning studies (FMEs) and analyses to better prepare communities for implementing flood mitigation projects.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the availability of flood hazard data that uses the best available land use and precipitation data to reduce gaps in floodplain mapping.	25% gap reduction	95% gap reduction
B	Increase the number of entities that conduct detailed studies of localized/urban flooding impacts within the FPR.	Establish a baseline measurement	30%
C	Increase the number of communities that utilize latest and most appropriate precipitation and land use data as a basis for design criteria and flood prevention regulations.	Establish a baseline measurement	30%

Goal 3. Reducing Property Damage & Loss

Increase the number and extent of protective regulatory measures and programs to limit future risk and reduce flood damage in the flood planning region.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the number of entities that have floodplain standards that meet or exceed the NFIP-minimum standards.	5	25
B	Reduce the number of structures within the 1% floodplain (i.e. through structural projects, property buyouts, acquisitions, elevations, and/or relocations).	5%	10%
C	Reduce the vulnerability of agriculture, ranching and forestry to flood-related losses.	Establish a baseline measurement	30%
D	Reduce the number of critical facilities within the 1% floodplain	5%	10%
E	When relocation and/or elevation adjustment is not possible, increase the number of non-residential facilities that implement floodproofing	5	25

Goal 4. Floodplain Preservation

Maintain the natural and beneficial functions of floodplains by preservation and conservation programs.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the acreage of publicly protected natural areas for flood and ecosystem purposes to reduce future impacts of flooding.	Establish a baseline measurement	10%
B	Increase the number of entities that include the 1% annual chance floodplain on Future Land Use plans and other planning documents	20	50
C	Avoid new exposure to flood hazards by adopting comprehensive plans or subdivision regulations that direct development away from the floodplain.	Establish a baseline measurement	10%

Goal 5. Flood Infrastructure Improvement

Reduce flood risk and mitigate flood hazards to life and property through the maintenance and rehabilitation of existing infrastructure and implementation of new flood infrastructure projects.

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase the number of nature-based practices as part of flood risk reduction projects.	Establish a baseline measurement	30%
B	Improve flood infrastructure and maintain streams and drainage channels to reduce flood risk to agricultural lands.	Establish a baseline measurement	10%
C	Improve urban drainage infrastructure to minimize flood risk.	50 miles	500 miles
D	Perform regular inspections and maintain existing dams, levees, and other flood mitigation structures.	Establish a baseline measurement	10%

Goal 6. Expanding Flood Education & Outreach

Increase the amount of flood education and outreach opportunities to improve awareness of flood hazards and future participation throughout the flood planning region (FPR).

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Improve the participation of community stakeholder entities in the regional flood planning process.	35%	90%
B	Increase the number of local entities that host annual public outreach and education activities to improve awareness of flood hazards, benefits of flood planning, and procedures associated with emergency response associated with flooding.	Establish a baseline measurement	50
C	Increase the number of communities that work cooperatively as part of an overall floodplain management program.	5	25

Goal 7. Expand Funding

Goals	Specific Goal Statements	Short Term (2033)	Long Term (2053)
A	Increase communities with dedicated stormwater funding mechanisms	10%	30%
